bardeen.ai

Automate all manner of repetitive browser based tasks with no-code.

The screenshot displays the Bardeen website interface. At the top, a navigation bar includes links for Home, Product, Use Cases, Explore, Resources, and About. The main heading reads "Automate your manual tasks." followed by the subtext "Automate repetitive tasks without code right from your browser." Below this, there are two buttons: "Try it - it's free" and "Watch video". A small text note states "Free forever, no credit card required". To the right, a diagram illustrates a workflow: "Get data from website" leads to "Add data to Google Sheet", which then leads to "Send Slack message". A callout box titled "Save" provides an example: "LinkedIn profiles to Google Sheets and notify Slack", noting it "Saves 15 min". At the bottom, a testimonial from Alicia states she runs this automation 30 times per week, saving 7 hours.

wordtune.com

Beat articulation problems by saying exactly what you mean through clear and compelling writing.

The screenshot shows the Wordtune website with a purple background featuring a large leaf pattern. At the top, navigation links include 'blog', 'we're hiring', 'FAQ', 'Plans', 'Summarizer', and 'Wordtune Editor'. The main headline reads 'Your thoughts in words' in large white font, followed by the subtext 'Say exactly what you mean through clear, compelling and authentic writing.' Below this is a yellow button that says 'Add to Chrome it's free'. On the right side, there is a white box representing the Wordtune Chrome extension interface. It has a Gmail icon in the top left, a 'Rewrite' button in the top right, and a toolbar with icons for undo, redo, and a Wordtune logo. The text 'This opportunity interests me.' is highlighted, and a dropdown menu shows three suggestions: 'I'm thrilled about this opportunity', 'I find this opportunity very interesting.', and 'I am interested in this opportunity.'

lex.page

Bust writer's block and unlock your best writing.

Welcome to Lex! (Start here)

Imagine a thought partner who's always ready to help while you're writing.
(Spoiler: you don't have to imagine it. It's here!)

Lex is a new word processor that has all the features you expect from a Google docs-style editing experience. But—it *also* has an AI thought partner built-in to help unlock your best writing. Over time, the more you use it, the better Lex will get.

Ready to try it? Finish the sentence below the line, then type **+++**.

For example, you could make it say "Generate a list of blog post ideas about how AI will change writing." After that, feel free to just play around! When you're writing anything and feel stuck, all you have to do is type **+++** and Lex will give you an idea of what to say next.

(PS—you have 5 invites! To invite friends/colleagues to join you, create new documents, or to read more about what Lex can do, just click the logo in the top left.)

Transcript:

Jane Wilde:

Hey all, great to meet everyone. So where are we on this?

Oscar Maine:

Hi Jane. We'll prepare and share an overview deck with your team this week. Please have your colleagues take a look at it.

Jane Wilde:

Thanks Oscar. Do you have a timeline for setting up an integration with our ERP? That would be very helpful.

Meeting Writeup:

Summary:

Jane Wilde and Oscar Maine discuss setup of a software tool for procurement optimisation. They align on the steps required for approval. Jane Wilde asks about an ERP integration.

Action Items:

- Oscar should share an overview deck with Jane Wilde
- Jane should review this with her colleagues
- Check what the timeline for an ERP integration would be
- Set up a meeting with Procurement
