What do I need to know?

A few things to know before you install agents on hosts within your network.

Cloud Agent Requirements:

These are the requirements for installing agents on your hosts.

- Your hosts must be able to reach the [Qualys Cloud Platform](#) or the Qualys Private Cloud Platform over HTTPS port 443.
- We support:

Windows (.exe)	Windows Client Versions Windows Server Versions
Linux (.rpm)	Red Hat Enterprise Linux CentOS Fedora OpenSUSE SUSE Amazon Linux Oracle Enterprise Linux
Linux (.deb)	Debian Ubuntu

Turn help tips: On | Off

Create a new activation key

An activation key is used to install agents. This provides a way to group agents and better manage your account. By default this key is unlimited - it allows you to add any number of agents at any time.
